

CampusPulse

Personal How-To-Use Guide
College Event Management System

Application URL: <http://127.0.0.1:5000>

User roles: Student, Organizer, Administrator

Purpose: Manage events, participation, feedback, PA points, and reports.

This downloadable guide is for personal use only and is not part of the website.

Quick workflow

1. Open CampusPulse

Launch CampusPulse.exe. The application opens in its own desktop window. The homepage provides Login, Admin Login, Create Account, and How-To-Use.

2. Create an account

Choose Create Account, enter a name and unique email, select Student or Organizer, and use a password with at least eight characters. Administrator accounts are managed separately.

3. Sign in

Use Login for student or organizer accounts. After successful authentication, the system opens the dashboard for the selected role. Use Admin Login for the administrator portal.

4. Student event actions

Students can view approved upcoming events, check dates, deadlines, capacity, and fees, then register or cancel before the deadline.

5. Paid events

A paid event displays its fee and the Pay via SBI Collect action. Free events display Free and do not show a payment link.

6. Student feedback

After an organizer marks an event completed, registered students can submit one rating from 1 to 5 and optional comments.

7. Organizer event creation

Organizers select Add Event and enter the title, description, venue, dates, capacity, fee type, ticket fee, and intercollege setting. New events start as Pending.

8. Complete an event

After an approved event takes place, the organizer selects Mark Complete. Registration closes and feedback becomes available.

9. Administrator review

The administrator reviews pending events and selects Approve or Reject. The admin title bar intentionally provides How-To-Use and Logout only.

10. PA points and reports

For completed events, the administrator selects Calculate PA. The system applies the participation, feedback, and intercollege bonuses, then offers PDF and Excel exports.

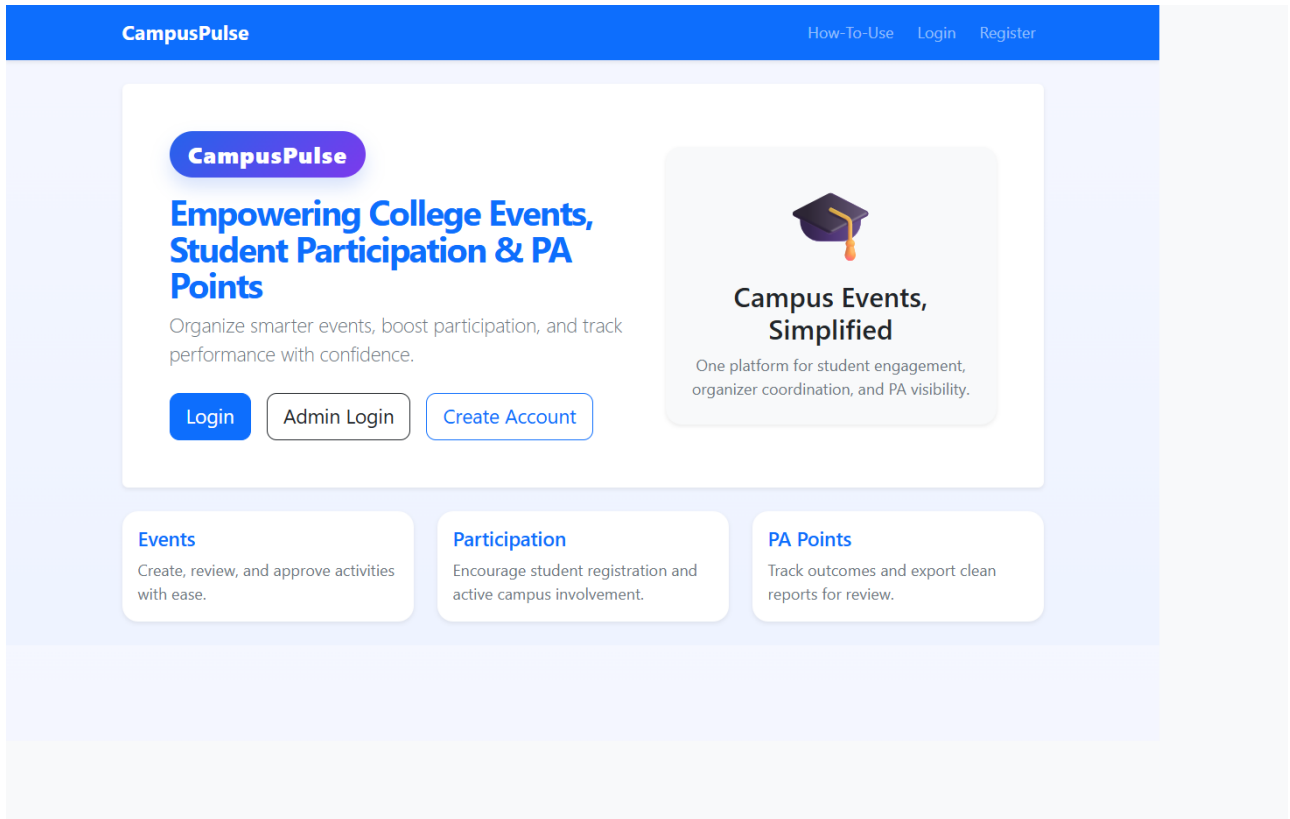

11. Log out safely

Select Logout when finished. Administrator logout returns to the homepage; student and organizer logout ends the authenticated session and returns to login.
